# Rohit Samariya

Web Developer | Transitioning to Full-Time Laravel Developer | PHP | MySQL | REST APIs

## Profile

I am a skilled **Web Developer** with 2+ years of experience in building web applications using **PHP, MySQL, REST APIs, Tailwind CSS**, and Laravel (self-learned). I have worked on real-world projects and have strong knowledge of backend development, authentication, database modules, and performance optimization.

I have built applications such as a **Geo-Fencing Attendance System** and a **Restaurant QR Ordering System**, gaining hands-on experience in developing complete solutions independently.

Currently, I am seeking a **Laravel Developer** opportunity where I can grow further and contribute to building quality products.

## Recent Projects

**1. Attendance & Workforce Management System (Laravel SaaS)**

**GitHub Repo:** https://github.com/rohitsamariya/attendance-saas

A scalable attendance and workforce automation platform designed to help organizations manage employee attendance, geo-location check-ins, multi-branch operations, and HR reporting through a centralized admin dashboard.

**Key Features:**
· Owner/Admin can create office locations using current GPS or map-based location selection
· Configurable **Geo-Fencing radius** (100m, 200m, etc.) to validate attendance within office premises
· Multi-branch support — admin can create multiple office locations and assign employees accordingly
· Employees can punch-in/punch-out only when inside the assigned geo-fence zone
· Secure employee access with user ID and password

**Smart Attendance Automation:**
· Auto punch-out system — if an employee forgets to check out (14–16 hours), the shift is automatically closed
· Late arrival tracking — repeated late entries can trigger half-day attendance rules
· Shift-based attendance calculation — auto mark **half-day or absent** if minimum working hours are not completed

**Employee Dashboard:**
· View daily punch-in/punch-out activity logs
· Manage profile details and upload important documents

**Admin & HR Controls:**
· Complete visibility of employee working hours, presence, and attendance summaries

· Download employee-uploaded documents directly from the admin panel
· Generate attendance reports in **PDF and Excel formats**
· Holiday management module
· Working days and attendance policy configuration

**Tech Stack:** Laravel, PHP, Tailwind CSS, MySQL, REST APIs, Blade, JavaScript

## 2. Restaurant QR Ordering & Table Management System (Laravel SaaS)

**GitHub Repo:** https://github.com/rohitsamariya/restaurant-saas

A complete restaurant automation web application built to streamline table-wise ordering, kitchen workflows, and staff coordination using a QR-based system.

**Key Features:**
· Restaurant owner/manager can add and manage tables from the admin panel
· Auto-generated QR codes for each table with downloadable scanner prints
· Customers can scan the QR code to open the menu page based on the selected table
· Option for customers to switch tables if required
· No customer login required — direct and frictionless order placement
· Table-wise order tracking integrated with kitchen operations

**Role-Based Workflow System:**
· Chef Module: Receives orders, updates status from *Preparing* to *Ready to Serve*
· Waiter Module: Confirms serving and marks orders as *Served*
· Receptionist Module: Handles payment confirmation and closes orders as *Completed*

· Real-time order status updates across all staff roles
· Smooth and responsive UI for mobile-first restaurant usage

**Tech Stack:** Laravel 12, PHP 8.2, Tailwind CSS, MySQL, Blade, JavaScript

## 3. NGO Help Platform (Laravel REST API + Admin Panel)

**GitHub Repo:** https://github.com/rohitsamariya/ngo-rest-apis

A comprehensive role-based platform designed to connect **Seekers (people in need)** with **Helpers (volunteers)** through a robust REST API ecosystem and a web-based Admin Dashboard.

**Key Features:**

- Seekers can raise normal or emergency ("Quick") help requests
- Real-time request status tracking with dedicated API endpoints
- Activity logs and request history for users
- Donation tracking system with detailed monitoring
- Location-based helper assignment using live coordinates

**Role-Based Workflow System:**

- Seeker Module: Create requests, track progress, view past activities
- Helper Module: Receive alerts, accept/reject tasks, mark completion
- Helpers can toggle availability (Online/Offline) and update live location
- Admin Module: Manage users, block/unblock helpers, monitor requests & donations
- Admin dashboard analytics with PDF report export for requests and donations

**Tech Stack: Tech Stack:** Laravel 12, PHP 8.2, MySQL, Laravel Sanctum, Firebase Cloud Messaging (FCM), Google Maps API, DOMPDF

## Experience

### LARAVEL DEVELOPER | LOOPYMINT | DEC 2024 – PRESENT

Work as a Laravel Developer focused on backend and application architecture.

**Key Achievements:**

· Developed backend modules using **Laravel, PHP, MySQL** with MVC architecture

· Built secure **REST APIs**, authentication systems, dashboards, and database-driven workflows

· Implemented database-driven features and query optimization

· Managed deployments, migrations, backups, and live maintenance

· Contributed to scalable web application development and implementation

· Managed hosting, deployment, migrations, backups, and live project maintenance

### WEB DEVELOPER | LOOPYMINT | JULY 2023 – DEC 2024

Work as a Web Developer focused on frontend development.

**Key Achievements:**

· Developed responsive interfaces using **HTML**, **CSS**, **JavaScript**, **Bootstrap**

· Built cross-browser compatible UI layouts and structured webpages

· Converted designs into functional web pages

· Assisted in testing, debugging, and website performance improvements

· Worked in an agency environment handling multiple projects under strict timelines

## Technical Skills

· Laravel, PHP, MySQL
· REST APIs, Authentication
· Tailwind CSS
· JavaScript
· HTMl5, CSS3, Bootstrap
· Blade Templates, MVC Architecture
· Git & GitHub, Deployment (cPanel/Hosting)
· Postman, Performance Optimization

## Professional Abilities

· Client Communication & Requirement Gathering
· Problem Solving & Debugging
· End-to-End Project Delivery

## Education

**HIGH SCHOOL DIPLOMA | M.G. INTERNATIONAL SCHOOL | SHRIMADHOPUR, RAJASTHAN**

**BACHELOR OF COMPUTER APPLICATIONS (FINAL SEMESTER – JUNE 2026)**
**ST. ROCKS COLLEGE OF COMMERCE, SCIENCE & LAW | BORIVALI WEST, MUMBAI**

## Language

Hindi-Native

English-Fluent

## AVAILABILITY

Open to: **Laravel Developer | PHP Backend Developer | Aspiring Full-Stack Laravel Developer roles**.
